Linear Pendant (No shades)

The Smithsonian Institute is charged with both preserving our heritage and shaping our future. The institute is home to a brass and cast iron candlestick created by Bradley & Hubbard Manufacturing Company in the early 1900s. Inspired, our designers created a collection of hard-wired lighting fixtures based on the candle holder. The strong arms of the fixtures replicate the shape and feel of the Arts and Crafts style candlestick. The clean, linear arms of the fixtures and soft creamy candles successfully tie the new with the old, creating an updated traditional style. The rich, dark undertones of the multi-layered Cordoban Bronze finish is brightened with brushed highlights. The dramatic look of the collection is completed with optional matte black metal shades with gold interiors. This Linear Pendant is perfect over a long table.
